

CHAD VEZINA VISION STATEMENT

As member at large, I will continue the SBUR tradition of building programming, workshops, and networking opportunities for the next generation of urologic researchers. I will work with the executive committee to expand outreach to NIH funded undergraduate, graduate and post-graduate training programs to increase their representation at our meetings. I will seek opportunities to grow our membership by ensuring meetings and programs are inclusive of all urologic research areas. I will work to strengthen partnerships with related societies and NIH funded urologic research centers.
